GTA 5 Cheat Codes

To access any of these cheats on consoles, quickly enter the code using the buttons, triggers, and d-pad, then you'll receive a notification on-screen if you did it correctly - note that using cheats will disable Achievements/Trophies for your current play session. PC players can hit the tilde key (~) to bring up the command console, then type in the required cheat codes. On all formats, you can use your phone to activate cheats by bringing it up and opening your Contacts, hitting the relevant button to reveal the keypad, then dialling the appropriate number - these are always 1-999 followed by the PC cheat code spelled out, which should make them easier to remember.
